

Post Graduate Certificate Course in Health System and Management - 2013

Module 2: Assignment E

Terminologies in Health

**Indian Association of Preventive and Social Medicine
Gujarat Chapter**

Assignment Set E

1. Critically review laboratory testing policy of H1N1 Influenza A 2009 virus
2. Explain the importance of legal approaches in case of organ donation
3. Develop input, process, output indicators for Health problem of your choice (please mention how will you calculate, method/source for data Collection)
4. Comment on quality of services provided regarding immunization at your PHC attached to RHTC. Comment based on IPHS or NABH standards.
5. Visit one of the NGO in your city. Describe the NGO in terms of Management team, objectives, organization, structure, function, coordination with govt., budgeting, benefit to community, etc. (No two students must visit the same NGO).

Some points to keep in mind before writing the Assignment.

1. The assignments are to assess your level of understanding about the topic, and capability of applying analytical skill, logical thinking and creative thinking using public health sense and field situation.
2. Your short writing filled with skills and senses mentioned above will get higher grade than elaborative writing without reflection of understanding.
3. We don't stress hard facts and figures; so don't waste time for searching, but key information (not necessary exact with citation of source) will enhance the level of your assignments.
4. We will give two sets of assignments. One will be for submission; another will be for self exercises. You can prepare-discuss self-assignments for self exercise with your colleague or teachers for greater advantage.
